# What's New in GPT-4

AI is evolving at a scary pace. I dove deep into the GPT-4 Technical Report and some videos, and here's what's fresh.

- Multimodal: support both image and text
- Increased word limit to 25,000
- Human-level performance on academic benchmarks
- More creative & collaborative
- Better safety
- Not so open: no further details about the architecture, hardware, training compute, etc.
