IaaS, PaaS, Cloud Native… How do we get here?

The diagram below shows two decades of cloud evolution.
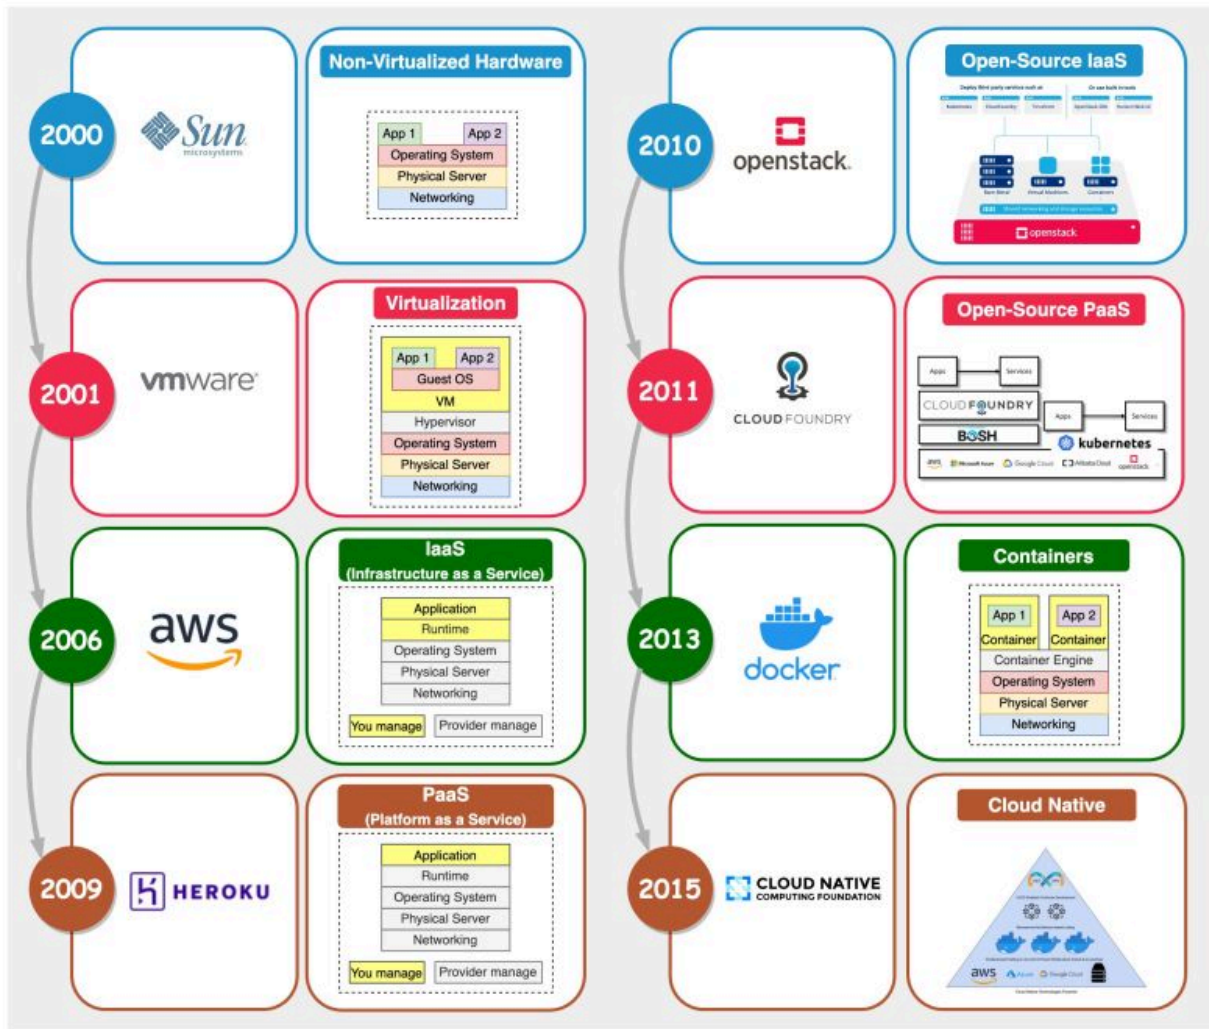

2001 - VMWare - Virtualization via hypervisor
2006 - AWS - IaaS (Infrastructure as a Service)
2009 - Heroku - PaaS (Platform as a Service)
2010 - OpenStack - Open-source IaaS
2011 - CloudFoundry - Open-source PaaS
2013 - Docker - Containers
2015 - CNCF (Cloud Native Computing Foundation) - Cloud Native

Over to you: Which ones have you used?
